

- Lead hydrogen arsenate
- Lead (II) bis (methanesulfonate)
- Lead diazide, Lead azide
- Lead styphnate
- Lead dipicrate
- Trilead diarsenate

**Candidate List**

**Authorisation List (Annex XIV)**

**Authorities and stakeholders Properties & intermediate use (info uses, exposure and substitutions)**

**Authorities and stakeholders Priorities and exemptions**

- Non-Pb Consortium substances**
- Lead dinitrate
  - Lead titanium trioxide
  - Acetic, lead salt, basic
  - Pyrochlore, antimony lead yellow
  - Tetraethyllead
  - Lead cyanimidate
  - Lead Titanium Zirconium Oxide
  - Silicic acid, barium salt, lead-doped
  - Basic lead carbonate (trilead bis(carbonate)duhydroxide)
  - Lead bis(tetrafluoroborate)
  - Silicic acid, lead salt

- Pb Consortium substances**
- Lead monoxide
  - Lead tetroxide
  - Pentalead tetroxide sulphate
  - Tetralead trioxide sulphate
  - Sulphurous acid, lead salt, dibasic
  - Fatty acids, c16-18, lead salts
  - Trilead dioxide phosphonate
  - Lead oxide sulphate
  - Dioxobis(stearate)trilead
  - [phthalate(2-)]dioxotrilead

- Lead chromate
- Lead chromate molybdate sulphate red
- Lead sulfochromate yellow
